Work Experience

Daktronics, Inc. – Software Developer

November 2016 - Present

- Develop software applications using full-stack web development tools and methodologies.
- Report progress and work in a development team to contribute to both small and large projects.
- Perform code maintenance on existing software products.
- Participate in frequent research and development to explore better business solutions.
- Provide training and assistance to new employees.
- Write unit and integration tests with C# and Jasmine JS for new and existing code.

Daktronics, Inc. – Software Quality Assurance Tester

October 2015 – November 2016

- Utilized Daktronics' testing tools and methodologies.
- Discovered and reported numerous software deficiencies with TFS and internal bug tracking software.
- Provided training and assistance for new employees.
- Setup and maintained numerous LED displays used for testing.
- Created and maintained test scripts with C# to perform automated testing.

Gollaher Business Services – Data Analyst

June 2014 – October 2015

- Created reports using Business Objects and Microsoft Excel.
- Created T-SQL queries in SSMS to pull data from tables.
- Performed testing throughout multiple databases.
